

The image is a screenshot of a web browser window displaying a configuration page for a Growatt TLXH Inverter. The browser's address bar shows the URL '192.168.178.101/ui/de/index.htm'. The page is in German and features a yellow header bar with a 'Löschen' (Delete) button. Below the header, there's a section for 'Gerätekonfiguration' (Device Configuration). This section includes a dropdown menu for 'Geräte-Typ' (Device Type) set to 'Growatt TLXH Inverter', a text field for 'Typ des Zählers / Wechselrichters / Batteriespeichers' (Type of meter / inverter / battery storage), and a text field for 'Adresse' (Address) set to '192.168.178.65:502'. To the right, there's a text field for 'ID' set to '1'. Below these fields, there's a checkbox for 'TCP-Verbindung halten' (Keep TCP connection) which is currently unchecked. A green button labeled 'Zähler Test' (Meter Test) is positioned below the configuration fields. Below the button, the test results are displayed, showing the device version (2.8.1 ESP), time (2025-09-02 17:25:05), device name ('meter_growatt_tlxh_inv'), address (192.168.178.65:502), ID (1), COM errors (1), and last error (not connected: 192.168.178.65:502). At the bottom of the page, there's a yellow button labeled 'Abbrechen' (Cancel). The Windows taskbar at the bottom shows the time as 17:25 on 02.09.2025.
